

Table 1: List of localities per time unit for Europe, large carnivorans. The columns indicate the identifier and name of the locality, the age bounds, the coordinates (latitude; longitude), the average hypsodonty (H) as well as the number of distinct orders, of genera and of species recorded (Nbs). General localities, where many small fossil localities were lumped together into a larger unit, are marked with a ★.

See corresponding figure at https://zliobaite.github.io/patterns_compex/?region=Europe&fauna=Carnivorous

Locality		Age (Ma)	Coordinates	H	Nbs
MN2		21.70–19.50	29 localities
