

Table 1: List of localities per time unit for North America, small mammals. The columns indicate the identifier and name of the locality, the age bounds, the coordinates (latitude; longitude), the average hypsodonty (H) as well as the number of distinct orders, of genera and of species recorded (Nbs). General localities, where many small fossil localities were lumped together into a larger unit, are marked with a *.

See corresponding figure at https://zliobaite.github.io/patterns_compex/?region=North-America&fauna=Small

Locality		Age (Ma)	Coordinates	H	Nbs
