

Table 1: List of localities per time unit for Europe, large herbivores. The columns indicate the identifier and name of the locality, the age bounds, the coordinates (latitude; longitude), the average hypsodonty (H) as well as the number of distinct orders, of genera and of species recorded (Nbs). General localities, where many small fossil localities were lumped together into a larger unit, are marked with a \star .

See corresponding figure at https://zliobaite.github.io/patterns_compex/?region=Europe&fauna=Large

Locality	Age (Ma)	Coordinates	H	Nbs
MN2	21.70–19.50	52 localities		
20870 Montaignu-le-Blin	21.70–19.50	46.833 ; -1.333	1.00	2/13/16
